Projects

Zapp | *React.js, TypeScript, Node.js, Express.js, OpenRouter API* | GitHub

- Built a full-stack app generator that converts natural language prompts into complete React.js/Node.js projects in under 30 seconds using the LLaMA 4 Maverick model via OpenRouter API.
- Implemented auto-detection logic to identify project types from user prompts and designed REST API endpoints for prompt processing and code generation.

ResumeLens | *Next.js, Puter.js, Tailwind CSS* | GitHub | Live Demo

- Built an AI-powered resume analyzer that scores resumes across five dimensions and generates an executive summary and improvement areas using Puter.js.
- Implemented ATS optimization scoring and PDF text extraction with section-by-section feedback.

SmartAttendee | *MERN Stack, React.js, Node.js, MongoDB* | GitHub | Live Demo

- Collaborated in a team of 6 to build a QR-based attendance automation system with role-based dashboards for administrators, faculty, and students, addressing manual roll-call inefficiencies and proxy attendance.
- Owned the dashboard frontend, building UI components for QR-based attendance logs, user management, and analytics across admin, faculty, and student roles.
- Integrated REST APIs, connecting React components to Node.js/Express endpoints and MongoDB for attendance tracking and data persistence.
